I rated it 5 but I have a problem that will have most people You will smile in their coffee cups because it doesn't matter how I still try, looking, studying and searching for cantons to find out how to view the settings so you can access the equalizer. Please some can only tell me. Many thanks later my son crashed the screen of my expensive tablet I got a gift, I went and bought me very cheap just to watch Netflix and things. Come and discover that this cheap tablet has a very poor sound quality, so after searching for searched To increase your loudspeaker volume I found this and it works almost too well lol. I don't know how he does it but I'm so happy to do it and I highly recommend it to everyone. It really works at the top of the EQ where you can see the musical volume Click on the speaker symbol and you will see extra volume that will give you 20Percent more volume and when using the EQ trimmer actually works like your home stereo, more increases The keys the strongest sounds the only thing is that the extra bass does not work, but you really don't need it because the low key on the EQ is more than enough for any speaker I give this 5-star Developer app, Kartum Infotech, it indicated the Privacy Practices of the app may include data management as described below.
