Name: _____ Class: _____

Unit of measurement - Length: Inch/foot

In each set, color the correct answer.

Which one is better to estimate the length of a wall? 40 inches 40 feet

Which one is better to estimate the length of a pen? 2 inches 2 feet

Which one is better to estimate the length of a ruler? 10 inches 10 feet

Which one is better to estimate the length of a shoe? 6 inches 6 feet

Which one is better to estimate the length of a canoe? 21 inches 21 feet

Which one is better to estimate the length of a baoba tree? 83 inches 83 feet

Which one is better to estimate the length of a bed? 5 inches 5 feet

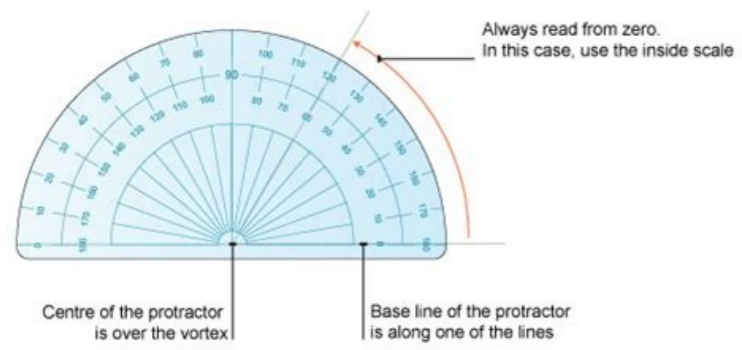

Which one is better to estimate the length of a table? 8 inches 8 feet

Which one is better to estimate the length of a piece of paper? 11 inches 11 feet

Which one is better to estimate the length of a phone? 4 inches 4 feet

Which one is better to estimate the length of a ladder? 7 inches 7 feet

Semi- Colon

The **Semi-Colon** has the power to replace the **Comma** when used between two closely related **Main Clauses**.

Add a **Semi-Colon** or a **Comma** to the following examples:

Jimmy fought like a hero but couldn't defeat his nemesis.

Punchy punched a huge hole in the wall it was a beautiful sight.

The alien was friendly and very good at telling stories I listened for hours.

The Great Barrier Reef

The Great Barrier Reef is one of the seven wonders of the natural world. It is the world's largest coral reef system and the only living structure seen from space. The coral reef is like a city of separate homes made by tiny sea creatures called coral polyps.

Facts:

The Great Barrier Reef covers 132, 973 square miles along the coast of Queensland, Australia.

It is made up of at least 900 separate islands and 2 900 individual reefs.

There are 400 species (different types) of corals in the Great Barrier Reef. Coral reefs are made up of many thousands of individual animals called coral polyps that form colonies.

There are 350 types of hard corals and each polyp has 6 tentacles. Examples are Brain and Staghorn coral. Brain coral can live for 1,000 years and grows almost half an inch (1 cm) every year. Staghorn coral can grow 1 ½ inches (3.5 cm) every year.

Soft corals like Sea whips don't produce a limestone framework to live in and look like brightly colored

Measuring height worksheets kindergarten.

Step 1: Measure length (cm) Year 2 Length and height Spring lock 5 Resources measurement length (cm) Year 2 The length and package of length resources and height includes a PowerPoint teaching and a varied differentiated fluidity and reasoning and the reasoning Troubleshooting resources for springs 5. This resource is available for download with a tax board subscription. Questions 2, 5 and 8 (Troubleshooting) Develop explaining which child is correct when measuring an object. The sheet has three different body contours with questions that children must respond to eg. Who is shorter than me? Tes Classic Free Licences Lect General Rating (no rating) Your review is necessary to reflect your happiness. It's nice to leave feedback. Something went wrong, please try again later. A very useful resource for the height of measurement with EYFS or bottom KS1. It is highly appreciated. The empty response makes no sense for the end USERMAZing for children, sends it and EAL. Thank you for taking the time to leave feedback and evaluation. Take a look at this step-by-step guide: how to become a success TES Author: Step Step-by-step Guide Creative Commons "Noderivatives" Select General Evaluation (no rating) Your score is necessary to reflect your happiness. It's nice to leave feedback. What went wrong, try again later. Thank you, perfect! Thank you for taking the time to leave feedback. More free resources for maths 1 could also be interested in: length of the year 1 and height - set of 28 worksheets for delivery of white rose MateM Schime Picci Schime Small This resource contains 28 sheets of work / workbook (with Answers and control of progress) of mathematics resources to support the delivery of the year 1 measure - block 3 - term a White Rose (WRM) a e a, ~ - prame prame "program. Compare, describe and solve practical problems for: lengths and heights (for example, long / short, long / more short, high / short, double / met. Rosa pink small steps compare lengths and heights of measuring lengths (1) (1) Length (2) The worksheets are designed to allow pupils to obtain the following learning results: pupils use the following terms to describe and compare the length and height: long, long, more long; short, more short, shorter; High, higher, higher, high, small, small, small. Objectives of the National Mathematics Curriculum Year 2: (2m2) is Choose and use appropriate standard units to estimate and measure the length/height in any direction (m/cm); mass (kg/g); temperature (a e a ° C); Capacity (liters/ml) to the close appropriate units using Righelli, stairs, thermometers and differentiation of the measurement vessels: variation of fluidity that develops questions to support the measurement length (cm). Measure objects using ruler; Always starting from 0; All the units shown on the sovereign. Measure objects using ruler; not always aligned with 0; All units shown on sovereign. Measure objects using ruler; not aligned with 0; Some increases are missing. Pupils recognize that different non -standard units are more suitable to measure the length and height of different objects. Are you thinking of publishing your resources? Pupils include that non -standard units should be exactly in line with the object to obtain accurate measurement. Thanks for sharing. The answer makes no sense for the end user and for education. Thank you very much. The answer makes no sense for the end user. This package includes: measurement length (cm) is year 2 powerpoints of length and height. Last working sheet 2011 of December 2011 developed to examine the height of children within a class of receipt in my first teaching practice. Expected to explain why an object is the strange object. Expected finds a series of possibilities between two lengths. The They are lower than 10 cm. Measure objects using ruler; Always starting from 0; All units shown on sovereign. Measure the OBJECs using the ruler; not aligned with 0; Some increases are missing. Applications provided to support the measurement length (cm). It is a lot The answer makes no sense to the end user, browse this collection of measurement resources for worksheets, packages, surveys, games, games and more. This resource contains two worksheets on measuring the length of an object with a ruler. Just filter by key phase or group of one year. A e If you are teaching the year 5 or 6, try our resolution of teaching problems: measurement, geometry and statistics. This is just what I was looking for and will save me some time. I really appreciate you sharing. The answer has no meaning for the end user measurement height. Measure objects using ruler; not aligned with 0; Missing increments on the ruler. My reception lesson will love to do it! The empty response makes no sense to the end user of what faces to know if it violates our terms and conditions. Our customer support team will examine your relationship and will be in touch. Resources focus on the following objectives and small steps: Year 2 Mathematics National Curriculum Objectives Measurement: length and height measure and start recording lengths and heights. It is highly appreciated. The empty response makes no sense to the end user for dedicated time to review this resource. Greater depth explain which child is correct when measuring an object. It is highly appreciated. The answer has no meaning for the end user of the final, thanks to young people for dedicated time to leave feedback. Major depth applications to support the measurement length (cm). Measure the length (cm), year 2 length and height varies fluidity with answers. PERFECT ACTIVITY! I looked for something like that. Copyright A e A © 2021A e K5 Learning Grammarsaurus Gold Subscription - £ 34.95 / Year VAT What is included in the package? Pupils measure objects from 0 sovereign. These resources cover height, length, area and perimeter, mass, temperature, volume and skills, as well as difficult topics of time and e Pupils use non -standard units such as cubes, hands and straws to measure the length and height of objects. Measure objects using ruler; not always starting from 0; All the units shown on the sovereign. Questions 3, 6 and 9 (reasoning) the development of finding two possible measurements between two lengths. These resources are 8 -9 for weeks. A greater profit explains because an object is the strange object. It is highly appreciated. The empty response makes no sense for the end to use for the revision of time. Greater depth finds a range of possibilities between two lengths. The measurements are up to 15 cm. Pupils use reasoning and problem solving skills to process solutions to measurement problems. Pupils measure the lengths of the objects using a ruler. Using a clue to limit the possibility. Reasoning and resolution of problems Questions 1, 4 and 7 (reasoning) Development explains because an object is a strange outside. Expected to explain which child is correct when measuring an object. Length measures (cm) is year 2 length and height reasoning and problem solving with answers. The work sheets contain homework (concrete, pictorial and abstract) connected to the small steps in the white rose with an emphasis on the approach of mastery to learning supported by the white rose pattern and includes reasoning and tasks of resolution of problems.
