Set image bitmap imageview android

How to get the image from imageview in android. How to show image in imageview android. Android imageview set image bitmap programmatically. How to set image to imageview in android.

In this method, we check if the activity that has been activated was actually the image gallery (it is common to trigger intent other than the same activities and predict the result from each). Consider a requirement, you want your user of the app select the image from the gallery and use that image to do some things. A display of the image to view the selected image by the user and a button to activate the Image Gallery .open Layout / Main.xml in your Android project and replace its content following the following: File: Res / Layout / main .Xml
