Prédiction 2024 2025

The Portrait of Michel de Nostredame (Nostradamus) by César de Nostredame in a crystal ball | Shutterstock.com Ah Nostradamus. The gift that keeps on giving. The seer that keeps on seeing. Credited with foretelling major world events such as the death of the French king Henry II and the rise to power of Adolf Hitler, Nostradamus made countless predictions about the past, the present and the future. Of course, opinion about his talents remains deeply divided to this very day. A cynic may argue that his quatrains are cannily phrased in such a way that vagueness and obscurity reign supreme, allowing his words to be tailored to any given situation after the fact. Nonetheless, there are plenty who are thoroughly convinced he's the greatest prophet to ever walk the Earth. So where does the truth lie? Well, there's only one way to find out. After scouring his words with a fine-tooth comb, we've come across a handful of possible predictions for next year. If they turn out to be true, he's a genius. Or we are. Or both. Read more about Predictions February 2022 witnessed a major escalation in eastern European tensions as Russia invaded Ukraine. In the intervening months and years, hundreds of thousands of casualties have occurred and millions have been displaced in the continent's biggest crisis since World War II. But could an end be in sight? Through long war all the army exhausted, so that they do not find money for the soldiers; instead of gold or silver, they will come to coin leather, Gallic brass, and the crescent sign of the Moon. An exhausted army and even more exhausted coffers could spell the end of hostilities, though how exactly it will come about remains uncertain. The mention of Gallic brass hints at French involvement, while the crescent moon points to Turkey. Both countries have expressed support for Ukraine in the past, so could perhaps have a role to play in the resolution of the conflict. Read more about Mysteries However, things might not be all plain sailing on the European front - and this time the UK is implicated. When those from the lands of Europe See England set up her throne behind Her flanks, there will be cruel wars. The ancient plague will be worse than enemies. The mention of England (the concept of Britain didn't exist in Nostradamus' time) withdrawing into itself is almost certainly a pointer to the Brexit referendum and its continuing fallout. But if worker shortages and border delays were bad enough, warnings of 'cruel wars' and 'ancient plague' sound a far more ominous note. Are you noticing a pattern developing in Nostradamus' work yet? The oracle was very fond of both doom and indeed gloom, it seems, and he didn't restrict his pessimistic positing to this side of the Atlantic. Many have credited him with predicting 9/11, but the words below could refer to the southern part of the Americas. Garden of the world near the new city, In the path of the hollow mountains: It will be seized and plunged into the Tub, Forced to drink waters poisoned by sulphur. 'Garden of the world' is surely the Amazon rainforest, while 'the new city' could refer to the planned Brazilian capital of Brasilia. Mountainous terrain abounds in that part of the world, while the mention of being 'plunged into the Tub' suggests flooding and 'sulphur' implies volcanic activity. 'Mysterious rumblings' near a long-dormant volcano set Cariocas on edge a couple of years ago... could their misgivings be found to have a basis in 2025? Read more about Predictions Image: Cosmin Ifrode / Shutterstock.com So far it's been typically morbid fodder from Nostradamus, so it's refreshing to see he still has time to dip into the sporting world, too. In two separate quatrains, he makes reference to the cock besting the eagle, with football fans recognising this as a clear allusion to Tottenham Hotspur (whose crest features a cockerel) and Crystal Palace (whose nickname is the Eagles). The Cock will see the Eagle, its wing poorly finished. By the Lion will it be put into extremity. These lines suggest that Crystal Palace will be forced into dire financial straits by the Premier League (symbolised here by the lion), presumably for falling short of PSR regulations. Tottenham will then take advantage of their vulnerability by strengthening their own wing, which must mean they'll snap up Eberechi Eze. The hypothesis is confirmed later on with the line 'weakness to the eagle, strength will be born to the cock'. For more articles about Nostradamus and other famous prophets, check out our Prophecies hub Après 2024 et ses quatre aspects négatifs contre deux positifs, voici 2025 qui inverse la donne avec quatre aspects positifs contre trois aspects négatifs. Dès fin janvier et le sombre semi/carré (45°) Saturne/Pluton, écho de l'année précédente, juin reflète la fin d'une problématique européenne (cycle Jupiter/Saturne), encore présente en décembre 2024. Bonne nouvelle : 2025 contient quatre aspects positifs contre seulement deux aspects négatifs ! Le sextile Saturne/Uranus de début avril remettra les pendules à l'heure et le passé à l'ordre du jour, en harmonie avec le renouveau, mettant en vedette l'innovation et l'invention. Un climat prometteur qui se concrétisera dès la mi-août (12/8), avec effet sur le début 2026. En revanche, à la mi-juin 2025, le carré Jupiter/Saturne parachèvera une problématique (crise ?) européenne, présente depuis l'année précédente. Précisons que juin sera le mois le moins harmonique de l'année... ..En attendant 2026, l'année lumière ! En effet, 2026 ne contiendra pas moins de 8 aspects positifs sur 9, reflétant un probable changement de société. Un scoop qui sonne comme une renaissance! Mais revenons à 2025... En vedette : Le CYCLE SATURNE/NEPTUNE de 36 ans qui régit le devenir de l'ex-JURSS depuis la conjonction de 1917 revient à l'actualité. En effet, 1917+ 36= conjonction de 1953 (mort de Staline) ; + 36 ans= conjonction de 1989 (chute du Mur de Berlin et fin de l'URSS). Or, 1989 + 36= conjonction en août 2025 puis en février 2026 > Début d'une MUTATION DE L'ENTITE SOVIETIQUE. L'analyse du Ciel de V.Poutine en 2025 nous en dira davantage... LES FAVORIS ET LES MAL-AIMES EN 2025 2025 s'annonce comme une année somme toute équilibrée. En effet, Jupiter, alias le « Grand bénéfique », fait suite à 2024 où les signes de terre et d'eau furent privilégiés jusqu'en juin, suivis ensuite par les signes d'air et de feu : ces derniers ont pris la relève jusqu'à la fin de l'année et se voient ainsi protégés sur tout le premier semestre, à savoir jusqu'à fin juin 2025. Dès juillet 2025, avec l'entrée de Jupiter en Cancer, ce sera le tour des signes d'eau et de terre (Taureau, Vierge et Capricorne -avec un bémol pour ce dernier) d'être gâtés par les faveurs jupitériennes. The Congressional Budget Office periodically updates its economic forecast to ensure that its projections reflect recent economic developments and current law. This report provides details about CBO's most recent projections of the economy through 2025, which reflect economic developments as of June 22, 2023. Over the 2023-2025 period, in CBO's latest projections: Economic growth slows and then picks up. The growth of real (inflation-adjusted) gross domestic product (GDP) slows to a 0.4 percent annual rate during the second half of 2023; for the year as a whole, real GDP increases by 0.9 percent. After 2023, growth accelerates as monetary policy eases. Real GDP increases by 1.5 percent in 2024 and by 2.4 percent in 2025. That initial slowdown in economic growth drives up unemployment. The unemployment rate reaches 4.1 percent by the end of 2023 and 4.7 percent by the end of 2024 before falling slightly, to 4.5 percent, in 2025. Payroll employment declines by an average of 10,000 jobs per month in 2024 and rises by an average of 6,000 jobs per month in 2025. Inflation continues to gradually decline. Growth in the price index for personal consumption expenditures (PCE) slows from 3.3 percent in 2023 to 2.6 percent in 2024 and 2.2 percent in 2025. That slowdown reflects several factors, including softening labor markets and flagging growth in home prices (and even declines in some regions), which passes through to rents. The Federal Reserve further increases the target range for the federal funds rate (the interest rate that financial institutions charge each other for overnight loans of their monetary reserves) in mid-2023. It begins reducing that target range in the first half of 2024, as inflation continues to cool. The federal funds rate declines from 5.4 percent in the fourth quarter of 2023 to 4.5 percent in the fourth quarter of 2024 and 3.6 percent in the fourth quarter of 2025.
