missions for clients. Any deviation, even if not due to Control-M, is capable of detecting it, making recovery much faster. Jorge Suzano, Support Specialist at TIVIT Information Technology & Services 201-500 employees Read full review We use Control-M to automate practically all processors that involve batch, we even automate deploys through the tool, in the case where we work, we faced many challenges before Control-M arrived. Verified Reviewer Banking 5001-10,000 employees Read full review Due to various integrations with different APIs, we have great possibilities for new products and solutions. Rafael Modesto, Especialista Control-M at Cielo Banking 1001-5000 employees Read full review A very effective tool for orchestration, routine automation, and extraction of compiled reports... Erika Chamberlino, Analista at Bradesco Seguros Banking 10,001+ employees Read full review Control-M is the best automation tool I've ever used on the market. Its versatility in connecting to many platforms helps with day-to-day work. Verified Reviewer Banking 5001-10,000 employees Read full review I use this tool daily and wouldn't consider using anything else. Leonardo Bergamini, Estagario em Analise de Produo at Bradesco S.A Banking 10,001+ employees Read full review Simple to learn different functions in batch job scheduling and administrations. Efficiency in monitoring and trouble shooting. Verified Reviewer Business Supplies & Equipment 1001-5000 employees Read full review With Control-M, we have greater autonomy and ease in executing and maintaining these routines, thus streamlining day-to-day activities. Verified Reviewer Food & Beverages 10,001+ employees Read full review The tool executes several routines that represent different commercial areas and with the implementation of these routines in Control-M, it brought greater autonomy to the team regarding maintenance, monitoring and continuous improvement in business processes. Verified Reviewer Food & Beverages 10,001+ employees Read full review Control-M has demonstrated a positive ROI by enabling significant cost savings, improving service delivery speed and accuracy, and facilitating business expansion through automation and streamlined processes. Verified Reviewer Transportation/Trucking/Railroad 5001-10,000 employees Read full review Control-M has reduced our month end closing time by 1 to 2 days by timely workflow execution and it automates error notification when ever we have a failure over the workflows. Lakshmi Harika Vanga, Associate Projects at Cognizant Computer Software 10,001+ employees Read full review Control-M is very user friendly. Even a first time user can easily use and schedule the jobs. Lakshmi Harika Vanga, Associate Projects at Cognizant Computer Software 10,001+ employees Read full review I have used the product for over 20+ years. It is the best. George Thorn, Control-M Consultant at Robert Mark Technologies Information Technology & Services 11-50 employees Read full review We have optimized the company's collection processes and therefore improved cash flow Carlos Andrs Snchez Rueda, Organizacin Terpel SA at Organizacin Terpel SA Oil & Energy 1001-5000 employees Read full review Control-M stands out in the workload automation space for its robust orchestration capabilities, especially in complex, hybrid IT environmentsActiveBatch: Known for its rich integrations and intuitive workflow design Verified Reviewer Banking 10,001+ employees Read full review Enhanced Control-M Automation API continues to evolve to give customers all the control and ownership they need to accelerate application delivery. Verified Reviewer Banking 10,001+ employees Read full review Control-M is best for scheduling various cross dependent jobs running on different environments and different platforms.It's API functionality makes it easy to use and one can get the status and perform actions through programming. Verified Reviewer Banking 10,001+ employees Read full review To automate the daily BAU tasks so that we can save many number of MAN hours, at the same time to transfer any data securely the MFT control module plays a crucial role. Venkata Ramesh Nalapati, Control-M Administrator at SAB Banking 5001-10,000 employees Read full review Without the use of Control-M's automation our IT Department would be tasked with executing multiple scripts/tasks all day and night. That would NOT be efficient! Jamie Adelglass, Manager Business Intelligence Systems at BBU INC Consumer Goods 10,001+ employees Read full review Very stable product and very good Support Org. Verified Reviewer Insurance 501-1000 employees Read full review Control-M really applies well for mixed environments where multiple scripts need to run from different platforms and need to connect one application with the other without losing functionality. Sebastian Lizarraga, IT specialist at EY Accounting 501-1000 employees Read full review Control-M centralizes change management processes, issues, and problems, leading to better quality deployments and integrations. Overall, Control-M has significantly contributed to the efficiency of various business functions by automating processes, enhancing security, improving disaster recovery capabilities, and supporting IT service management. Verified Reviewer Banking 5001-10,000 employees Read full review With Control-M we are able to monitor major part of our critical batches. Our production is optimized and execution planning is shared with all stakeholders. Verified Reviewer Facilities Services 10,001+ employees Read full review Control-M allows us to automate server cleaning tasks and review work history which in turn helps us to lower the manpower required and increase efficiency. Also the platform's several reporting choices helps us to simplify the internal and external audit processes. Alex Trostenev, Product Manager at Iteration Information Technology & Services 1001-5000 employees Read full review We use Control-M to automate tasks on a schedule. This product has given us a central place to monitor jobs visually instead of going to each server to monitor Windows Scheduled tasks. This also lets non-admins run jobs as a self-service as well as be able to load balance tasks and Control-M servers. Verified Reviewer Utilities 501-1000 employees Read full review Its well suited for what its designed for: workload automation. Honestly, it excels at this. Head and shoulders above other tools out there in my opinion. Verified Reviewer Utilities 1001-5000 employees Read full review Control-M addresses the following business challenges: Operational efficiency: Automating manual tasks reduces human error, improves productivity, and frees IT staff up for more strategic initiatives. Process reliability: Ensuring critical business processes execute on time and accurately, minimizing disruptions and downtime. Scalability: Handling increasing workloads and data volumes efficiently without compromising performance. Compliance: Adhering to regulatory requirements and internal policies by automating audit trails and control processes.Cost reduction: Optimizing resource utilization and reducing operational expenses through automation. Verified Reviewer Telecommunications 10,001+ employees Read full review Loving Control-M for 24 years and counting Verified Reviewer Information Technology & Services 10,001+ employees Read full review Cost Savings - by automating manual tasks we're able to reduce man-hours and be more accurate Verified Reviewer Information Technology & Services 10,001+ employees Read full review We rely on Control-M for the scheduling of workflows for intraday and overnight data processing. It also ensures that jobs are run in the correct sequence and all dependencies are met. Verified Reviewer Financial Services 201-500 employees Read full review Everything goes through Control-M. Today, we execute over 200,000 jobs in Control-M. Besides being impossible to execute this manually, Control-M prevents operational errors. Verified Reviewer Financial Services 1001-5000 employees Read full review Control-M is used for job automation and coordination across many multiple applications and infra environments globally. This ensures dependencies are addressed, allows quick notification on failure and pinpoints where that failure is, and ensures jobs can be re-run when needed Verified Reviewer Entertainment 10,001+ employees Read full review Allowed single automation platform rather than multiple team dependent or location dependent tools Verified Reviewer Entertainment 10,001+ employees Read full review Powerful and easy to work with Verified Reviewer Insurance 501-1000 employees Read full review Control-M has a very user friendly interface when compared to the other tools out there, Bug thumbs up for that, Varun Singh, Data Product Manager at MGM Hospitality 10,001+ employees Read full review I have worked with other job schedulers and Control-M had led the market since its introduction. The user-friendly GUI not only provides ease of use for the users, but also for the support teams. Verified Reviewer Insurance 501-1000 employees Read full review Control-M by far is the leader in this industry. The ease of use of the product and the ability to get others up to speed using the product because of this is great. Verified Reviewer Hospitality 10,001+ employees Read full review Previously we used to run our workload in CA workload automation but it was not implemented right, then we decided to have a more robust tool with a good partner for implementation. Rafael Ferreira da Silva, Solution Architect at Banpara Banking 1001-5000 employees Read full review Out of the box, Control-M is relatively intuitive, but what BMC offers in training helps out and fills the gap of the knowledge required to be a specialist. Kevin Chiu, Team Lead of Application and Cloud Services at WCB Alberta Insurance 1001-5000 employees Read full review Control-M is still the future! Verified Reviewer Information Technology & Services 51-200 employees Read full review Any company that wants to automate their processes and workload must get Control-M. Frankie Lam, Advance Engineer at Federal Reserve Bank of Richmond Financial Services 10,001+ employees Read full review Control-M was a great scheduler...but now he's more than that. Now Control-M has become a perfect orchestrator. Verified Reviewer Banking 10,001+ employees Read full review It is a very innovative and feature-rich solution and can be used to complete many diverse tasks and solve different issues, resulting in significant time savings and cost-effectiveness. Verified Reviewer Telecommunications 10,001+ employees Read full review It is an extremely intuitive tool with great documentation and usage examples even on YouTube. Verified Reviewer Banking 1001-5000 employees Read full review Control-M has given us the benefit of working with external agencies through its managed file transfer system. This has enabled us to work beyond our previous scope of work and brought the ability to bring us to the next level. Pat Byrne, Higher Executive Officer at Dept Social Protection Government Administration 5001-10,000 employees Read full review I started working with Control-M in 1996, and even though I stepped away from it for 10 years, I have seen continuous improvements. While checking the market for alternatives to Control-M, I have seen that there is nothing comparable. Verified Reviewer Furniture 10,001+ employees Read full review It has become part of our system, without which it would impact our business or day to day processing. It did make our life easy with its automated features, integration, easy to use, with lot of API and plugin which are deployed, customization of jobs or job as a code. All this feature did really helped us to stay ahead in our business functionality. Verified Reviewer Health, Wellness and Fitness 10,001+ employees Read full review Control-M pays for itself within 12 months of purchase, sometimes sooner. Mark Francome, Senior Systems Analyst at The Stamford Group (Stamford Consultants and Talents) Banking 201-500 employees Read full review By using rich features from Control-M, we were able to achieve integration for the dynamic generation of thousands of jobs. API features from Control-M provide future-ready environments. Verified Reviewer Information Technology & Services 10,001+ employees Read full review I have used other tools for this type of programming, and they do not offer the same level of flexibility as CTM. It is very useful when creating chains and cycles, so it is also worth highlighting the option to view the jobs that are going to be launched on a certain day. Verified Reviewer Banking 501-1000 employees Read full review Control-M has excellent features to integrate with other applications via Control Modules. Verified Reviewer Banking 10,001+ employees Read full review Use ML-driven insights to surface issues before they impact users, then drill into probable cause and recommended actions. Built-in expertise and AMI Assistant help shorten RCA. Proactive insights and alerts Probable cause analysis AMI Assistant accelerates RCA Explore BMC AMI Ops Insight Put a GenAI advisor in the middle of your orchestration so teams can ask questions in plain language and get recommended next steps. When I create a new record, it creates like a new table? Using what? Just curious of how this works at a low level and calculate the possible "cost" of having multiple records or having 1 record with a lot of data. - Discussion - BMC Community6.Alexis BernardDo cognitive features in ITSM 25.4 require IBM Watson? - Discussion - BMC Community7.Adam Lawsonsinsert data into HPD:Incidentinterface. Create Form to create an incident ticket. - Discussion - BMC CommunityThank you to all our Solutions Champions for your dedication, your time, and your willingness to help. Your efforts ensure that every member feels supported, inspired, and encouraged to contribute.Congratulations to our November Solutions Champions! Your passion, knowledge, and generosity are what make the BMC Community truly exceptional. Keep sharing, keep inspiring, and keep being the heart of our community!you could be next months star! 19-Nov-25 Ayman Sayed Chief Executive Officer Donald Wagner Access Industries Blair Christie Independent Director Leah Sweet Independent Director Lewis Stevenson Independent Director BMC Helix is a portfolio of SaaS offerings delivering cognitive service management that is fast, accurate and cost-effective, across multi-cloud, multi-device, and multi-channel environments. BMC Helix services are delivered from a variety of cloud locations and receive the benefits of BMC's world-class SaaS Operations team and processes.Cognitive service management integrates emerging technologies like artificial intelligence (AI) and machine learning (ML) into the enterprise, transforming every layer of service delivery. This end-to-end cloud offering uses containers to give customers the ability to execute their business processes from your contracted service locations. BMC Helix services include cognitive capabilities (Bots/AI/ML) and help enterprises transform their service management from reactive to proactive and predictive, with increased accuracy and speed, and reduced cost.Cloud -services are delivered in a SaaS model allowing for easy consumption and predictive operational costs.Containers -leveraging container technology, BMC Helix services are designed to run on any type of public cloud.Cognitive -adding in cognitive capabilities, BMC Helix services provide end users and agents with an intelligent, integrated customer experience.Accuracy -services are delivered with the immediacy and accuracy that end-users expect, on their platform of choice.Speed -automate service desk processes and lever containers technology for increased business agility and reduced time for upgrades and DevOps integrations.Cost Savings -deploy optional chatbot and virtual agent services to deflect lower-level service calls, ease the load on support staff and reducing overall costs of your service desk.BMC Helix services are available from various service locations worldwide.BMC Helix services for Public Sector are specifically developed for educational, local, state and federal government agencies in the United States. To maintain operational and data integrity, this solution is staffed by authorized BMC personnel. The data for U.S. Public Sector offerings are separated individually across customers.BMC Helix services for the Federal Risk and Authorization Management Program (FedRAMP) are designed to comply withU.S. federal agency-specific processes for assessing and authorizing federalcloud computingproducts and services.FedRAMP consists of a subset of National Institute of Standards and Technology Special Publication(NIST SP)800-53 and (NIST SP) 800-171 security controls specifically selected to provide protection in cloud environments.BMC's FedRAMP certifications defined for the Federal Information Processing Standards (FIPS) 199 Moderate impact level.The FedRAMP services are staffed by U.S. personnel in U.S. data centers.BMC obtained its FedRAMP authority to operate (ATO) authorization in April of 2016. Led by the SaaS Chief Information Security Officer, the FedRAMP team works continually to insure the latest releases of Helix applications and supporting components meet the compliance standards set by the FedRAMP program. FedRAMP testing is conducted annually by a third-party. BMC offers the following services with the ATO:BMC Helix ITSMBMC Helix Digital Workplace BasicBMC Helix Digital Workplace AdvancedBMC Helix Custom ApplicationsBMC Helix Premium ConnectorBMC Helix Business WorkflowsBMC Helix Multi-Cloud BrokerBMC Helix Cloud CostBMC Helix Cloud SecurityBMC Helix Automation ConsoleBMC Helix DiscoveryBMC Helix Operations ManagementBMC Helix Continuous OptimizationBMC Helix AIOpsFusion Agility Suite / Visual Boards for BMC Helix servicePublic Sector entities within the United Kingdom government may procure certain BMC cloud offerings through the UK Government G-Cloud framework. The G-Cloud program allows public sector organizations the ability to purchase services from the online Digital Marketplace store and eliminate the need to go through a competitive procurement process. BMC offers the following services via the gov.uk Digital Marketplace:BMC Helix ITSMBMC Helix Digital Workplace BasicBMC Helix Digital Workplace AdvancedBMC Helix Business WorkflowsBMC Helix Client ManagementFor additional information, seegov.uk Digital Marketplace.

Just curious of how this works at a low level and calculate the possible "cost" of having multiple records or having 1 record with a lot of data. - Discussion - BMC Community6.Alexis BernardDo cognitive features in ITSM 25.4 require IBM Watson? - Discussion - BMC Community7.Adam Lawsonsinsert data into HPD:Incidentinterface. Create Form to create an incident ticket. - Discussion - BMC CommunityThank you to all our Solutions Champions for your dedication, your time, and your willingness to help. Your efforts ensure that every member feels supported, inspired, and encouraged to contribute.Congratulations to our November Solutions Champions! Your passion, knowledge, and generosity are what make the BMC Community truly exceptional. Keep sharing, keep inspiring, and keep being the heart of our community!you could be next months star! 19-Nov-25 Ayman Sayed Chief Executive Officer Donald Wagner Access Industries Blair Christie Independent Director Leah Sweet Independent Director Lewis Stevenson Independent Director BMC Helix is a portfolio of SaaS offerings delivering cognitive service management that is fast, accurate and cost-effective, across multi-cloud, multi-device, and multi-channel environments. BMC Helix services are delivered from a variety of cloud locations and receive the benefits of BMC's world-class SaaS Operations team and processes.Cognitive service management integrates emerging technologies like artificial intelligence (AI) and machine learning (ML) into the enterprise, transforming every layer of service delivery. This end-to-end cloud offering uses containers to give customers the ability to execute their business processes from your contracted service locations. BMC Helix services include cognitive capabilities (Bots/AI/ML) and help enterprises transform their service management from reactive to proactive and predictive, with increased accuracy and speed, and reduced cost.Cloud -services are delivered in a SaaS model allowing for easy consumption and predictive operational costs.Containers -leveraging container technology, BMC Helix services are designed to run on any type of public cloud.Cognitive -adding in cognitive capabilities, BMC Helix services provide end users and agents with an intelligent, integrated customer experience.Accuracy -services are delivered with the immediacy and accuracy that end-users expect, on their platform of choice.Speed -automate service desk processes and lever containers technology for increased business agility and reduced time for upgrades and DevOps integrations.Cost Savings -deploy optional chatbot and virtual agent services to deflect lower-level service calls, ease the load on support staff and reducing overall costs of your service desk.BMC Helix services are available from various service locations worldwide.BMC Helix services for Public Sector are specifically developed for educational, local, state and federal government agencies in the United States. To maintain operational and data integrity, this solution is staffed by authorized BMC personnel. The data for U.S. Public Sector offerings are separated individually across customers.BMC Helix services for the Federal Risk and Authorization Management Program (FedRAMP) are designed to comply withU.S. federal agency-specific processes for assessing and authorizing federalcloud computingproducts and services.FedRAMP consists of a subset of National Institute of Standards and Technology Special Publication(NIST SP)800-53 and (NIST SP) 800-171 security controls specifically selected to provide protection in cloud environments.BMC's FedRAMP certifications defined for the Federal Information Processing Standards (FIPS) 199 Moderate impact level.The FedRAMP services are staffed by U.S. personnel in U.S. data centers.BMC obtained its FedRAMP authority to operate (ATO) authorization in April of 2016. Led by the SaaS Chief Information Security Officer, the FedRAMP team works continually to insure the latest releases of Helix applications and supporting components meet the compliance standards set by the FedRAMP program. FedRAMP testing is conducted annually by a third-party. BMC offers the following services with the ATO:BMC Helix ITSMBMC Helix Digital Workplace BasicBMC Helix Digital Workplace AdvancedBMC Helix Custom ApplicationsBMC Helix Premium ConnectorBMC Helix Business WorkflowsBMC Helix Multi-Cloud BrokerBMC Helix Cloud CostBMC Helix Cloud SecurityBMC Helix Automation ConsoleBMC Helix DiscoveryBMC Helix Operations ManagementBMC Helix Continuous OptimizationBMC Helix AIOpsFusion Agility Suite / Visual Boards for BMC Helix servicePublic Sector entities within the United Kingdom government may procure certain BMC cloud offerings through the UK Government G-Cloud framework. The G-Cloud program allows public sector organizations the ability to purchase services from the online Digital Marketplace store and eliminate the need to go through a competitive procurement process. BMC offers the following services via the gov.uk Digital Marketplace:BMC Helix ITSMBMC Helix Digital Workplace BasicBMC Helix Digital Workplace AdvancedBMC Helix Business WorkflowsBMC Helix Client ManagementFor additional information, seegov.uk Digital Marketplace.
