(Fix #14908, #14687, #14498) If you find any regression or critical bug, please report here: Notepad++ is a free (as in "free speech" and also as in "free beer") source code editor and Notepad replacement that supports several programming languages. Running in the MS Windows environment, its use is governed by GNU General Public License. Based on the powerful editing component Scintilla, Notepad++ is written in C++ and uses pure Win32 API and STL which ensures a higher execution speed and smaller program size. By optimizing as many routines as possible without losing user friendliness, Notepad++ is trying to reduce the world carbon dioxide emissions. When using less CPU power, the PC can throttle down and reduce power consumption, resulting in a greener environment. I hope you enjoy Notepad++ as much as I enjoy coding it. Release Date: 2023-05-15 Download 64-bit x64 Download 32-bit x86 Download ARM64 Download source code Download Notepad++ source code of current version and/or check sha-256 digests for binary packages on GitHub Integrity & Authenticity validation Notepad++ v8.5.3 bug-fixes and new features: Fix session file data loss issue. (Fix #13514) Fix Explorer context menu "Edit with Notepad++" needs restarting os to appear issue under Win 8/10.
