Usually, smartphone manufacturers support their devices in terms of software for a few years from their date of release. During this time, users regularly receive updates that add new features to an operating system. To update Android on your BlackBerry Passport, you need to follow a few simple steps, but before that, prepare for the process. How to check the current Android version on BlackBerry Passport>Please check your current software version before installing updates. If your Android is already up to date, you don't need to reinstall it. See which Android version you have: Open your phone settings. Press About phone. Find the item Android version. This is where the current software version will be indicated. At the beginning of 2021, it is Android 11, but Google is going to release another update to Android 12 soon.Preparatory phaseEach new version of software contains many new functions, but after installing them, there may be problems in the operation of some smartphones. This happens when users ignore the preparatory phase.Before updating your BlackBerry Passport, you need to follow 2 basic requirements: make sure the device has at least a 30% charge; reset your device to factory default settings. The first point is clear, but the second requires explanation. Resetting to factory settings means deleting all files from your device's memory. It helps you to avoid errors when installing updates.Of course, no one wants to lose their personal data, that is why you need to create a backup before resetting: Open the settings. Go to the Accounts and backup section. Select Google Drive. Backup up your data. These steps will help you move your data to cloud storage. You can restore it after upgrading your operating system.If there is not enough space on Google Drive to save all the information, you can create a backup copy using the "Backup & Restore" option. Move the resulting file to another device (for example, a computer), and after the updates are installed, return it to your smartphone's memory.After creating a backup, you can start resetting your phone to factory settings: Open the settings. Go to the Backup and reset section. Choose Factory data reset. Click Reset device. Confirm the operation. Now reboot your smartphone and then go directly to the process of installing the new software.Ways of updating Android on BlackBerry PassportThere are different ways of updating the Android OS, including both classic and alternative options. We recommend that you consider the upgrade methods in the order that is presented in this article.Over-the-air updateThis is the easiest and most common way to update your smartphone. The main condition here is to complete the preparatory steps and have an Internet connection.To update Android on your phone you need to: Open the settings. Press "System" or "About phone". Go to "System updates". Click Update. If there are updates available, you will be prompted to download the firmware file and click "Install". After that, your device will restart and be ready for further use.Manual update via settingsThis option is for those cases when your device cannot find an update over the air. To install the latest firmware version, download the installation file from the manufacturers official website. After placing the zip file in the device's memory, follow these steps: Open your device settings. Go to the System update section. Press the three-dots button, and then click the Select firmware file button. Select the folder where the zip file was saved. Confirm the installation of updates. The further process is the same that was presented earlier in the over-the-air updates. That is, your phone will restart, and after installing the firmware, you will be able to use it.Manual update via Recovery ModeThis method is similar to the previous one because here you also need to download the firmware file to your phone first, but the rest of the process is very different. To install updates, you need to go to the engineering menu (Recovery Mode).First of all, turn off your smartphone and hold down both the Power button and the Volume Up button for a few seconds. If nothing happens, change the combination to the Power button and the Volume Down button.If everything is done correctly, the recovery menu will appear on the screen. Use the Volume keys to navigate, and the Power button to confirm actions. If you want to perform an over-the-air update, select Reboot system now. The "Apply update from ADB" option is needed to install the firmware from the internal storage, and "Apply update from SD card" is for installing from the memory card. After selecting the desired option, confirm the operation and wait for the end of the process.What to do after installing updatesWhen the updating is completed, turn on your smartphone and check how stable it works. If everything is fine, you can restore your backed-up information.If the backup was uploaded to Google Drive, all you need is to log into your Google account, and the data will be restored automatically. If the backup file was placed on another device, you need to upload it back to your smartphone. If the backup was not restored automatically, try to operate manually. To do this, open the settings, go to the "System" section and restore the data. Share this page with your friends. The experts are at your disposal to help you.How to update Android or its OS on BlackBerry Passport Silver Edition?By owning a smartphone, you have an operating system, OS, that must be updated regularly.The Android operating system released for example in August 2016, is called Nougat or also called Android 7.0: each new Android operating system name has a confectionery name. Other OS like Ubuntu, Firefox or Apple's OS also have their names.We will take Android as an example in these next paragraphs. These systems include new features for Android devices, as it can be the case for your BlackBerry Passport Silver Edition. These updates are necessary for better performance of your BlackBerry Passport Silver Edition when used, but not mandatory. We will explain to you how to update Android on your BlackBerry Passport Silver Edition. First, we'll explain what the updates are for on a smartphone, second, how to update Android on your BlackBerry Passport Silver Edition, and finally, why these updates might fail. Explanation: Android updates on your BlackBerry Passport Silver EditionUpdates on a smartphone are very frequent, they can be offered to you several times a year. Performing an update consists of update the operating software on your BlackBerry Passport Silver Edition if they have Android, in order to improve their performance, have new features, have existing bugs fixed, repair security breaches, etc. The reasons can be very many. Therefore, by performing an update, it allows you to use all the capabilities of your smartphone.These updates are not mandatory but are strongly recommended.As soon as an update is available, you are notified with a notification. Do not worry, if you update you will keep all the information on your BlackBerry Passport Silver Edition. How to update Android on your BlackBerry Passport Silver Edition?Prerequisites for the Android update on your BlackBerry Passport Silver EditionBefore updating your BlackBerry Passport Silver Edition, there are a few mandatory rules for this update to run correctly. First of all, be connected to an internet network and not to your mobile network since the update may take a while and you may see the consumption of your mobile network's data. BlackBerry Passport must be charged at more than 50% or you can also recharge it during this manipulation. Finally, your BlackBerry Passport Silver Edition cannot be used during the software update so leave it next to you. Once you have gathered all these elements you can now start the Android update on your BlackBerry Passport Silver Edition.Android update on your BlackBerry Passport Silver EditionTo start this operation, go to the settings of your BlackBerry Passport Silver Edition and go to the About the phone section. When you click on it, you will need to press Software Update and then Update so that your BlackBerry Passport Silver Edition checks to see if an update is available or not. Finally, when your device has detected the update, all you have to do is press Restart and Install to start the update.The update can take longer or shorter depending on its size. Usually it does not last more than 10 minutes.Wait until your BlackBerry Passport Silver Edition restarts, then, after the update is complete, all you have to do is follow the instructions if changes are requested.The failures of an Android update on your BlackBerry Passport Silver EditionIt is possible that after carefully following all the instructions we have given you in order to update your BlackBerry Passport Silver Edition, it does not work.First of all, your memory may be full, making it impossible for you to update.All you need to do is free up space by deleting a few apps or photos that you have already transferred to your PC. Then the update may not work for some unknown reason.Check that your Wifi is well connected to your BlackBerry Passport Silver Edition, if that does not work, try to turn it on again then, if the problem persists then try to install the update a few days later. If you have any of the problems listed or have another problem, see your telephone company or authorized service representative so they can help you resolve the problem.We hope our article has helped you make updates on your BlackBerry Passport Silver Edition. All expert teams are at your disposal if you need more information. Find all our articles on BlackBerry Passport Silver Edition that help you. I want the latest software for my blackberry and the software version is 10.3.3.2137 is there any software above this one if so please may I have a link 07-14-20 02:51 AM Like 0 Devices in the BB line are typically updated for a couple of years, and the Passport has been around almost 6. 07-14-20 03:10 AM Like 0 07-14-20 07:13 AM Like 0 After updating I did not have gallery 07-16-20 01:19 AM Like 0 After updating I did not have gallery Updating to what version? Anything else missing, like Media Player or File Manager as well? I suspect you found a developer OS, and not the real full OS. 07-16-20 07:08 AM Like 0 Updating to what version? Anything else missing, like Media Player or File Manager as well? I suspect you found a developer OS, and not the real full OS. Uh-oh 07-16-20 03:34 PM Like 0 wish some former senior employees would fill us in on how far bb10 os would have went. 10:47 03-18-21 04:25 PM Like 0 wish some former senior employees would fill us in on how far bb10 os would have went. 10:47 What do you mean? It would have kept going indefinitely had BB10 managed to hit the required sales targets. Heck for that matter, BB11 then BB12 like all other successful Android/iOS numbering systems.... 03-18-21 04:51 PM Like 0 Heck for that matter, BB11 then BB12 like all other successful Android/iOS numbering systems.... Do you think they would have skipped BB13, they wouldnt have wanted to tempt fate now would they? 03-18-21 07:18 PM Like 0 Do you think they would have skipped BB13, they wouldnt have wanted to tempt fate now would they? LOL - They wouldve had BB13 and dragged it out 13 years with 1, 2, 3 and such all the way to a 13.13 since BB always tempted fate, more the worse the idea..... 03-18-21 09:02 PM Like 0 I still use my Passport everyday even though I do have more modern phones. I use it for most of the things you mention also I plan my work with the Deja Office CRM and the Kindle book reader works fine. There is an inbuilt FM radio but I also have an internet radio app that I use a lot. The apps I use are from the BlackBerry World, Playstore or Amazon Apps. It still does everything I want from a portable device, still it feels good in the hand and I personally think it looks good and is definitely different. If BlackBerry are bored and looking for something to do they want to try bringing the Passport up to day as I would buy one straight away. 03-25-21 09:31 AM Like 0 LOL - They wouldve had BB13 and dragged it out 13 years with 1, 2, 3 and such all the way to a 13.13 since BB always tempted fate, more the worse the idea..... Instead of BB13, they would have called it BBPerV. Posted via CB10 03-26-21 02:11 AM Like 0 Instead of BB13, they would have called it BBPerV. You can connect your device to Wi-Fi to download the update.You can also connect your device to your computer to download and install BlackBerry Link software to install the update.To receive the latest software update, your device must be on OS version 10.3.3.2205. If not, repeat the update process until youve installed 10.3.3.2205, and then you should be able to install the most recent software update. Dear All, First let me thank each of you for the support to fellow blackberry owners. I am a newbie here. My current device showing the current version 10.3.2.2836. I know, I want be able to get any more update using mobile network and have to use auto loader. Can you please guide me which is the latest stable auto loader version that I can use for blackberry passport-9EC5 (spw100-1). I do need help on auto loader, because I can see the size around 8.5 GB and include all mobile version. For example, if I was trying to download the Autoloaders: Kd0DSiLAiW6od4GcSMoHRk0GJzOQKO. So how i need to download here, do i need to download entire package which is around 8.5 GB? or only need to select the passport-one ( when i tried so, it was failing). Suppose once I downloaded the entire package, whats exactly are the next steps. Thanks, 08-27-18 05:56 AM Like 0 No - Just go into settings to 'check for software updates'. download directly to phone. It takes 30 minutes then another 15 or so to install. Leave phone on and charging so you have good power. You will have 10.3.3.2137 Only if the OP's carrier offers that version. Or if the phone is factory unlocked. 08-27-18 08:05 PM Like 0 I have a Passport Silver Edition that uses software release 10.3.3.2137. It says this is the latest software. How can I upgrade it? I've tried using autoloaders, but either the download site is gone or I download the file, then the phone can't open it.Idea?Thanks. You are on the latest. OS 10.3.3.3216 = SK 10.3.3.2137. 10-12-19 02:58 PM Like 0 About Me:ProjectBerry10 is an initiative to revive and enhance the BlackBerry 10 experience. We will be providing you all the necessary apps files still working on BB10 in 2024 and beyond. These apps will include social media, messaging, productivity, entertainment, games and more. And the best part is, all these apps will be given after testing on BB Passport and BB Z10, so you can be sure that they will work smoothly and securely on your devices.
