Follow these steps to download and install the Brother printer drivers: 1. Click on this link. 2) Type your model number in the field Search by Model Name, and press Search. 3) Click on Downloads. 4) On the Select Your Operating System (OS) page, be sure the correct Operating System is selected. Then, simply click on OK. 5) Click on the Full Driver & Software Package. * For Macintosh users: Download both the Printer and Scanner Drivers. 6) Please read the End-User License Agreement and if you agree, click on Agree to the EULA and Download. 7) Most browsers will download the file into your default "Downloads" folder and the package will automatically run. If you are prompted to Save the file, then browse to a location that will be easy to find and save the package. 8) If prompted, click Run. 9) Once the download is complete, Open File to begin the installation. 10) Follow the on-screen instructions. Depending on your individual computer security settings, you may need to be logged in as the administrator to follow the procedure below. Please follow these steps to download and install the Control Center 4 software: First, click Agree to the EULA and Download. Then, you may receive additional information about the downloaded file. Be sure to click Open File if prompted with a security warning. If prompted to open the file again, you can go to the location of your downloaded file. Typically, this is in your Downloads folder. When prompted to download and install the installation, choose OK. Then, follow the on-screen installation instructions. Once the installation is complete, please restart your computer. For additional support, please contact us through Live Chat or Ask a Question at the top of this page. Error: Unable to Connect to Network Please press OK to view an error report with troubleshooting steps. The Brother machine supports WPA2-PSK with AES, but if your network uses WPA2-PSK with TKIP, you may receive a "Connection Fail" error. Enter the wrong Authentication or Encryption method can also cause this issue. 9. Wait for about a minute and then print the Network Configuration report to verify that the Brother machine has acquired a valid IP address from your router. You can find instructions here. 10. Check if the IP Address listed on the report is valid for your network. If yes, you are now successfully connected to your network. Install software or use the Brother iPrint&Scan mobile app. However, if no, we will assist you in fixing the wireless connection. Entering Text Hold down or repeatedly press ▲ or ▼ to select a character from the list below; Press OK when the character or symbol is displayed. The cursor will then advance one position to the right and you may enter another character. Press Clear to delete characters entered incorrectly. To access ControlCenter 4, download and install the Full Driver and Software Package. Follow these steps in this link. If you see the CC4 icon in the task tray, double-click it. For Windows 7 or later, if you find the or button on the taskbar, click or button and check if the "CC4" icon is showing. If not, open Brother Utilities and follow these steps: - Windows XP, Vista, or 7: Double-click the Brother Utilities icon on your desktop. - Windows 8 or 8.1: Double-click the Brother Utilities icon on your desktop or click the arrow near the lower-left corner of the Start screen. - Windows 10 and 11: Double-click the Brother Utilities icon on your desktop. the touch-screen message changes. i. Press the color of the drum unit that you replaced. j. Press Yes. k. Press 百度知道>提示信息 知道宝贝找不到问题了>_
