The Windows 7 SP1 RTM update package is available for download. As usual, Microsoft also released Windows 7 with an integrated SP1 ISO image for OEM partners, MSDN and TechNet subscribers, and other users who do not want to install SP1 separately after installing Windows 7. Again, the original untouched official ISO image of Windows 7 with SP1 (Service Pack 1) was leaked on the BitTorrent (BT) network and file sharing sites long before its official release. Here are the download links for various versions of Windows 7 SP1 Integrated (build 6.1.7601.17154) in ISO image format. The ISO image is intact, unedited and unpatched and can be burned to DVD or mounted to a DVD virtual drive for easy access. The only difference between retail and OEM lies in the configuration file ei.cfg. The contents of the ei.cfg configuration file specify the edition and distribution channel of Windows 7 Service Pack 1 (SP1) to install. Removing the ei.cfg file deselects all available versions of Windows 7 during installation. ei.cfg removal process can be performed using ei.cfg Removal Tool to create all versions of Windows 7 SP1 ISO. Also, use Windows 7 ISO Image Edition switcher to change Windows 7 SP1 ISO version. If you need to convert and translate Windows 7 SP1 to another language, download Windows 7 SP1 Language Packs (MUI). Update 1: Download the official Windows 7 SP1 ISO. Update 2: Windows 7 SP1-U Media Update ISO ISO.
