Jika Anda melakukan tugas yang sama di atas dan lagi di Firefox, mungkin sudah waktunya Anda mengotomatiskan beberapa hal tersebut. Add-on iMacros gratis untuk Firefox mencatat ketukan dan tindakan Anda dan menyimpannya sebagai makro. Kemudian Anda dapat melakukan tugas yang direkam dengan mengklik tombol. iMacros untuk Firefox mengotomatiskan tugas di Firefox dengan merekam dan memutar ulang makro keyboard. Klik tombol iMacros di bilah alat Firefox, dan tambah tambah muncul di bilah sisi Firefox. Untuk merekam makro, klik tab Rekam, lalu klik Rekam. Setelah selesai merekam, klik Stop, beri makro sebuah nama, dan pekerjaan Anda selesai. Makro sekarang akan muncul dalam daftar, dan Anda dapat menjalankannya dengan menyorotnya, dan mengklik Putar di tab Putar. Untuk memulai, iMacros dilengkapi dengan makro yang dibuat sebelumnya, yang muncul di tab Play. Saat Anda menambahkan sendiri, mereka juga muncul di tab itu, dan Anda dapat melihat lusinan sekaligus. Apa yang dapat Anda lakukan dengan iMacros untuk Firefox? Hal yang serumit masuk ke akun email web seperti Gmail dan membuat email kosong, atau yang sederhana seperti memeriksa kutipan saham. Pengguna yang nyaman dengan scripting dapat membuatnya lebih baik juga, karena Anda dapat memberitahukannya untuk melakukan tugas-tugas yang lebih canggih, seperti melakukan pengujian situs Web secara otomatis dan mendalam. Selain itu, Anda dapat menggunakannya bersama dengan teknologi scripting lainnya, seperti Windows Scripting Host, sehingga Anda dapat memanggil skrip yang dibuat dengan iMacros dari dalam alat scripting lainnya. Tapi itu cukup sederhana untuk digunakan sehingga siapa pun dapat membuat makro dasar untuk tugas-tugas seperti memeriksa email dan mendapatkan harga saham. iMacros for Chrome v.1.1.1. Macros recorded with iMacros for Chrome can be replayed in iMacros for IE and iMacros for Firefox without changes! All iMacros versions combined have millions of active users, making it the most popular web browser automation tool.Requirements. Try iMacros Free for 30 days With over 10+ million downloads, iMacros is the world's most popular web automation, data extraction, and web testing solution. Why not use iMacros to take charge of your web automation needs today?iMacrosOriginal author(s)Ipswitch, Inc.Stable releaseOperating systemWindows 7 or later(2)PlatformIA-32 and x86-64(2)Available inEnglish + 10 other languagesTypeForm fillerScriptingServer monitoringSoftware testingWeb scrapingLicenseProprietarycommercial software(3)Websiteimacros.netiMacros for ChromeStable release10.0.5 / September 17, 2018; 23 months ago(4)PlatformGoogle ChromeLicenseFreeware(4)Websitewww.iopus.com/iMacros/iMacros for FirefoxStable releasePlatformMozilla FirefoxLicenseFreeware(3)Websitewww.iopus.com/iMacros/iMacros for Internet ExplorerStable release12.5 / November 7, 2018; 21 months ago(1)PlatformInternet ExplorerLicenseFreeware(3)Websitewww.iopus.com/iMacros/iMacros is a browser based application for macro recording, editing and playback for web automation and testing. It is provided as a standalone application and extensions for the Mozilla Firefox, Google Chrome, and Internet Explorerweb browsers. Developed by iOpus/Ipswitch, It adds record and replay functionality similar to that found in web testing and form filler software.[6] The macros can be combined and controlled via JavaScript. Demo macros and JavaScript code examples are included with the software. Running strictly JavaScript based macros were removed in later versions of iMacros browser extensions. Gds punto de ventas vs 5 crack online. However, users can use alternative browser like Pale Moon, based on older version of Mozilla Firefox to use JavaScript files for web based automated testing(7) with Moon Tester Tool.First created in 2001 by Mathias Rohlf(8). iMacros was the first macro recorder tool specifically designed and optimized for web browsers(9) and form filling(10). In April 2012 iMacros was acquired(11) by Ipswitch.iMacros for Firefox and Chrome offers a feature known as social scripting,[12] which allows users to share macros and scripts in a manner similar to social bookmarking. Technically, these functions are distributed on web sites by embedding the imacro and the controlling JavaScript inside a plain text link.[13]Along with the freeware version, iMacros is available as a proprietary commercial application,[3] with additional flow statements and support for web scripting, web scraping, internet server monitoring, and web testing. In addition to working with HTML pages, the commercial editions can automate Adobe Flash, Adobe Flex, Silverlight, and Java applets by using Directscreen and image recognition technology. The freeware version of iMacros contains no control flow statements and, with a few minor exceptions,[14] complex or conditional code requires scripting available only in the commercial version.Advanced versions also contain a command-line interface and an application programming interface (API) to automate more complicated tasks and integrate with other programs or scripts. The iMacros API is called the Scripting Interface. The Scripting Interface of the iMacros Scripting Edition is designed as a Component Object Model (COM) object and allows the user to remotely control (script) the iMacros Browser, Internet Explorer, Firefox and Chrome from any Windows programming or scripting language.
