ReStaff Release October 2021 Posted by: Archeia October 29, 2021 RPG Maker MZ 1.4.0 Update Published by: Archeia December 9, 2021 Welcome! Hello! My name is Justin Davis and I'm the developer of Open RPG Maker. If you want to contact me about Open RPG Maker then please use the email link below. However, if you wish to submit a bug report, please do so in the respective mailing list attached to my SourceForge account. Overview Open RPG Maker is a free and open source RPG 2D creation utility, similar to the popular RPG Maker series. Open RPG Maker is mainly based on RPG Maker 2003, but with some added features and a more advanced usability. This tool will allow users to create RPG 2D games similar to the original Fantasy Final games, such as FF5 and FF6. Although it will also support the creation of games by following a Zelda as playability. Unlike the RPG Maker series, Open RPG Maker will have the ability to play more than midi and wav files, to see a complete list of supported formats consult the wiki. Open RPG Maker will also use 32x32 tabs up to 24bpp, instead of the 16x16 8bpp limit on RPG Maker 2003. In addition, Open RPG Maker supports more than just PNG graphic formats, to see a complete list of supported formats see the wiki. Open RPG Maker v2.0 has already been published, which includes some bug fixes, as well as some important improvements in the features. Soon: There is now a version scheme in the development section that indicates what will be included in the next version. Powerful enough for a developer RPG MAKER was born to satisfy the desire to create an original RPG without programming knowledge. It has been four years since the release of the previous RPG MAKER, VX Ace. The gaming landscape, especially for role-playing games, has changed a lot. So did the needs of our users. With the latest installment, RPG MAKER MV allows the dreams of many of its fans to come true! RPG MAKER can now create RPGs for MacOSX, Android and iPhone! Text Link To help everyone create a game easily, we include some sample data that you can use easily! We have more than 100 Sample Maps, Character Generator Parts and more! RTP is now integrated into the engine to save users problems. RPG Maker MV uses the well-known JavaScript, in combination with HTML5 export. Mastering Javascript, you can change the game to your liking, from Battles to menu UIs. This feature is aimed at experienced developers. Now you have the ability to control all parts of the game. No more hidden classes! Now you can create your own RPG Maker games on Macintosh. It will be released at the same time as the Windows version. RPG Maker MV users will be able to create games for the following platforms: Windows/EXEMacOSX/APPAAndroid/APKIOS/IPAHTML 5 for web browsers Supports twice as many elements as VX Ace for a total of 2,000! By combining the resources included with this tool, you will be able to place your own original characters within a game. With the assets, you can produce countless visual patterns for your characters using this feature, which lets you change colors. RPG Maker MZ offers you a more powerful character generation function. To help everyone create a game easily, we include some data that can be used easily! We have more than 100 sample maps, pieces generator of character and more! RTP is integrated into the engine to save problems. When combining the resources included with this tool, you can place your own original characters within a game. In addition to combining assets, you can create innumerable visual patterns for your characters with This function, which also allows you to change colors. RPG MAKER MZ offers you a more powerful character generation function. An adding JS files to the Project Plugins folder, you will be able to select the Plugin in the plugins administrator. You can see script details, script parameters and the possibility of configuring it ON and OFF. Using Plugin Manager will be much easier to use than the old format. Allowing a minimum user interference to avoid errors and easily order the scripts as the previous creators. One of the lost functions of RPG Maker 2003, the search function of events is back! The more great your game, more variables, switches and events will use. Quickly more difficult to manage and find specific parameters. Using the event search tool will allow you to save time and quickly see all instances of a particular variable or switch!
