# Final cut pro 7 serial number generator mac

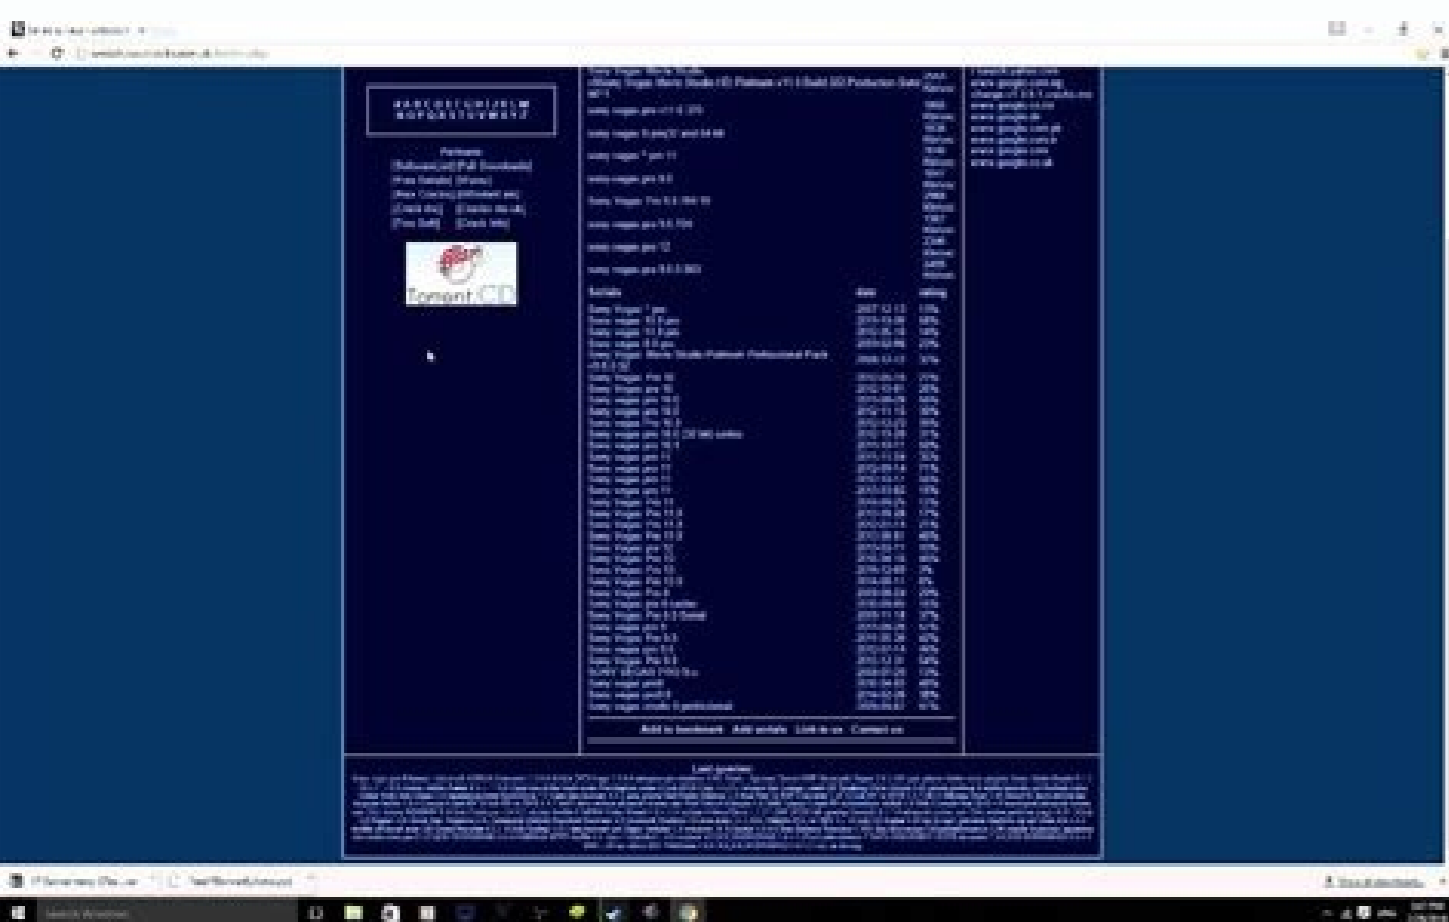

## Buttons

Here are only the buttons that affect **WHAT** is displayed in the Workspace. They either show/hide a window pane or switch between the available views on a window pane. There are other buttons that determine **HOW** the content in a window pane is displayed. Cover that later in the individual chapters.

- Main Window Panes** - These three buttons on the top of the Workspace let you toggle the three main Window Panes. Please note that the **Inspector** Pane cannot be hidden and at least the **Browser** or the **Timeline** Pane has to be open.
- Inspector Views** - These buttons on top of the Inspector Pane let you switch between the different Inspector Views. The purple button indicates the active view. Only the relevant buttons for the current selection are displayed.
- Timeline Index Views** - The Index button toggles the Timeline Index pane on (purple font) or off (white font).
- Timeline Index Views** - These up to four buttons on top of the Timeline Index pane let you switch between the different Timeline Index Views. The purple font indicates the active view.
- Effects/Transitions Pane** - These two buttons toggle between the Effects and Transitions pane. Purple indicates if a pane is visible.
- Audio Meter Pane** - The tiny Level Meter at the bottom of the Viewer and Event Viewer also functions as a button to toggle the Audio Meter pane in the Timeline.
